

VO Hub — Test Checklist

End-to-end verification across user-facing forms, admin tools, emails, QR/inventory, cron and recent bug fixes.
Print and tick off as you go.

0. Prep before testing

- All Supabase migrations applied: 078, 079, 080, 081, 082, 083, 084
- Reset + QR regeneration script executed (scripts/reset-and-regenerate-qr.sql, COMMIT)
- Shared mailboxes imported (scripts/import-shared-mailboxes.sql)
- Edge Function secrets set: FROM_EMAIL, REMINDER_TOKEN, IT_ADMIN_EMAIL, APP_URL
- Browser hard-refresh (Ctrl+Shift+R) to load latest assets

1. Hub & Auth

- Login via Microsoft SSO works
- Hub shows the 5 modules (Catalog, Onboarding, Offboarding, Mailbox, IT Request)
- Header: VO logo, product search bar, user menu top-right
- Dark / Light mode toggle works

2. Catalog & Equipment Request

Catalog

- Products listed with photos and stock
- Search works (Cmd/Ctrl+K)
- Phone modal asks only for data plan (no accessories)
- Router modal asks for plan + accessories
- Wishlist (heart) toggles

Cart → Details → Review

- Add several products to cart
- +/- quantity steppers respect product stock (button disables at max)
- Helper text 'N in stock' / 'Max reached' below the stepper

Mariya/Elena feedback round 2

- Pickup Date refuses past dates
- Return Date refuses dates $\leq$ Pickup
- Optional Pickup contact + Return contact fields visible
- Project name required
- Review step lists contacts when filled
- Submit → success toast and redirect to My Requests

Emails after submit

- Confirmation email arrives with VO logo at top
- admin@vo-group.be receives the notification email with logo

3. Onboarding form

Step Identity

- Profile dropdown contains EMPLOYEE (Permanent) and EMPLOYEE (Fixed-term)
- No INTRAMUROS in the list
- Companies in alphabetical order, AOP labelled 'AOP — Art on Paper', MIT labelled 'MIT — My Impact Tool'

- Email local part auto-suggested from first + last name
- Changing Company auto-updates the email domain on the right

Step Project (VO EUROPE only)

- Step is hidden when Company is anything other than VO EUROPE
- Visible with Project Name, Language, Country, Manager when Company = VO EUROPE

Step Dates

- Entry Date refuses past values
- Exit Date refuses anything before Entry Date

Step Access

- 'Teamleader (CRM licence)' present
- No 'TLO' entries

Step Distribution list

- For VO EUROPE: CMO-*, NEB-*, SUFW-*, etc. visible
- For other companies: only VO / Reception / Referents
- Each option carries a short description line under its name

After submit

- Confirmation email + admin email arrive with logo
- Open Admin → Users — the new hire shows up in the 'Pending Invitations' banner

Behaviour added in the latest commit

4. Offboarding form

Step Who

- Typing a name surfaces matching profiles in a dropdown
- Clicking a suggestion auto-fills Company
- Typing a name with no match still allows submit (no blocking)

Step When

- Departure date refuses past values

Step Revocation

- Toggling Transfer mailbox / SharePoint marks 'Transfer details' as required
- Out of office section: toggle + From / Until dates + message

Step Equipment

- If the picked user has assigned gear, a primary-bordered card lists it and auto-checks collect_laptop / collect_phone / collect_badge_keys based on detected categories
- If no gear detected: defaults stay as-is, no auto-flip

After submit

- Confirmation + admin email with logo

5. Mailbox form

- Field label reads 'Company' (not 'Agency')
- Dropdown contains the full list: AOP, KRAFTHAUS, MAX, MIT, SIGN BRUSSELS, THE LITTLE VOICE, VO CONSULTING, VO EUROPE, VO EVENT, VO GROUP, VO LAB, VO PRODUCTION, VO STUDIOS
- 'To be Created On' date refuses past values

- Display Name field shows the help text 'This is the sender name people will see...'
- Submit → confirmation + admin email with logo

6. IT Request form

- Date fields start_date / leaving_date / listing_date refuse past values
- Submit → confirmation + admin email with logo

7. My Profile (user side)

- Identity card, avatar, role badge
- Section 'Current equipment' lists assigned gear
- Section 'Assigned QR codes' lists codes the user holds
- Section 'Request history' across loan / IT / mailbox
- CRITICAL: open one request → type a note → 'Save note' → refresh → the note is still there

Fixed in commit dd51c59

8. Admin — Dashboard / Planning / Statistics

Dashboard

- Pending / In progress / Ready widgets render
- Charts show data (BU, category, monthly)

Planning

- /admin/planning loads the calendar
- Month / Week / Day / Quarter views switch
- Loan / IT / mailbox events show up

Statistics

- Charts populate without empty states

9. Admin — Requests

Equipment requests

- Pending list, click → detail
- CRITICAL: mark an item, scan or click a QR, assign → toast 'QR assigned', then /admin/qr-codes shows that code as 'Assigned' with the user's name. Also visible from the user's profile.

Fixed in commit 91f8ebd

Onboarding requests

- Filter chips: All / Pending / In Progress / Ready / Welcome
- Click a request in status 'ready' → inline 'Send welcome email' card
- Personal email → composer opens → welcome email sent

Offboarding requests

- List with status badges
- Detail shows OOO section + transfer details if filled

Mailbox requests

- List with status
- Detail → email composer
- Send the final mailbox email
- New 'Log it in the FMB inventory' card shows up under the email-sent badge
- Click 'Add to Shared Mailboxes' → modal opens with auto-filled fields
- Pick Category / Licence / Created in / Profile → Add to inventory
- Mailbox now appears in /admin/shared-mailboxes
- Refresh — card now reads 'Already in Shared Mailboxes inventory' (green)

10. Admin — Inventory

Local IT

- Local items list visible

IT Inventory

- CRITICAL: open /admin/it-inventory — page must render (not blank). If it does fail, the screen shows a clear 'Refresh page' CTA, not the generic 'Try again / Home' pair.

Fixed in commit e408c1b

- Editable cells: change a value, blur → it persists
- Export CSV downloads a file

Shared Mailboxes (new)

- /admin/shared-mailboxes lists the 130 imported FMBs
- Company + Category filters narrow the list
- Search by name / mail / project leader works
- Editable cells persist on blur
- Export CSV works
- Add new mailbox row works

Products

- Products listed, CRUD operations work

QR Codes (regenerated)

- Codes follow the VO-PRODUCTNAME-NNN pattern
- At least 5 codes per product
- All show 'Available' (except those assigned in section 9)
- Filters: All / Available / Assigned / by category
- Print QR / Bulk generate buttons work

Scan logs

- Scan history visible

11. Admin — Users

- Full user list with roles
- IMPORTANT: after submitting an onboarding (section 3), the new hire is in the 'Pending Invitations' banner at the top
Behaviour added in commit 41fa388
- Click a user → new Notion-style detail page:
 - - identity card with Business Unit / Profile / Mail / Job Title / Phone / Country / Date In / Date Out / Birthday
 - - 'Shared Mailboxes' section (FMBs led + accessible) — test with Alisson Borel after import
 - - 'Current equipment'
 - - 'Assigned QR codes'
 - - 'Request history'
- Toggling User ↔ Admin works
- Module toggles (Catalog / Onboarding / IT Form / Mailbox / Offboarding) persist
- Manual 'Invite User' dialog works

12. Admin — Settings

Email Templates

- All templates listed
- Edit one → preview renders with the VO logo

Design & Branding

- Logo URL is filled (otherwise emails fall back to text instead of the image)

Subscription plans

- Phone / data plans editable

13. Email styling — every email carries the logo

- Equipment request confirmation has the logo
- Onboarding confirmation has the logo

- Offboarding confirmation has the logo
 - Mailbox confirmation has the logo
 - Each admin notification has the logo
 - Status change emails (in_progress, ready) have the logo
 - Welcome onboarding email has the logo
 - Mailbox confirmation (1Password) has the logo
 - Return reminders have the logo
- If any email shows 'VO Hub' as plain text instead of the image: Admin → Design → Logo URL is empty.

14. Reminders cron (manual smoke test)

```
INSERT INTO it_requests (type, status, requester_email, requester_name, data)
VALUES ('onboarding', 'pending', 'you@vo-group.be', 'Test',
jsonb_build_object('first_name', 'Jean', 'last_name', 'Testeur', 'name', 'Jean Testeur',
'company', 'VO TEST', 'first_day', CURRENT_DATE + 2, 'last_day', CURRENT_DATE + 5));

SELECT net.http_post(
url := 'https://lzwtkmjioobfypnjwyxb.functions.supabase.co/daily-reminders',
headers := jsonb_build_object('Content-Type', 'application/json',
'Authorization', 'Bearer '),
body := '{} '::jsonb);

SELECT * FROM net._http_response ORDER BY id DESC LIMIT 1;
```

- Mail to admin@vo-group.be arrives (D-2 onboarding reminder)
- Mail to the request's requester arrives (D-7 offboarding reminder)
- Cleanup: DELETE FROM it_requests WHERE data->>'name' = 'Jean Testeur';

Otherwise you'll keep getting daily reminders for the test row.

15. Regression spotlight — recently fixed bugs

- Notes in My Requests persist after Save + refresh (fix dd51c59)
- QR assignment shows in /admin/qr-codes right after assignment (fix 91f8ebd)
- /admin/it-inventory no longer goes blank after a Vercel redeploy; if it fails, a clear 'Refresh page' button shows (fix e408c1b)
- Phone modal only asks for a data plan (no accessories) — fix d788237
- Offboarding auto-checks the right collect_* toggles based on detected equipment (fix d788237)
- After completing a mailbox request, the 'Log it in FMB inventory' card appears (commit 8005293)

Estimated time to run the full sweep: about 2–3 hours solo. Skipping the 130-row Shared Mailboxes inspection drops it closer to 1 hour. For every KO: screenshot + send to Nadir.
